Professional Profile

Software developer with extensive experience, a proactive attitude, and a strong focus on teamwork. I have a strong ability to solve complex technical problems, along with a constant drive to learn and master new technologies and overcome professional challenges. I have extensive professional experience working with **WordPress** and **WooCommerce**, having spent many years developing and maintaining solutions within this ecosystem. I am currently expanding my knowledge of **Android** application development using **Kotlin** and **Jetpack Compose**.

Education

IES Telesforo Bravo 2015-2018

Higher Vocational Training in Web Application Development.

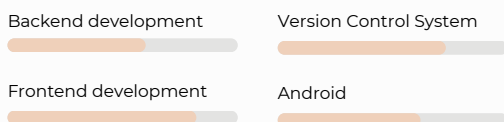

IES Telesforo Bravo 2013-2015

Higher Vocational Training in Networked Computer Systems Administration.

IES Manuel González Pérez 2011-2013

Bachelor of Science

Skills

Languages

Spanish — Native

English — Intermediate (B2)

Experience

Bluehost - Newfold Digital

Senior Full Stack Developer | 2022 - 2026

- Contributed to the development of Model Context Protocol (MCP) integrations for internal WordPress products, enabling secure connections between AI models and WordPress sites.
- Developed custom Gutenberg blocks with React, modernizing legacy WordPress interfaces into block-based editing experiences.
- Built scalable WooCommerce and WordPress solutions, improving performance, compatibility, and maintainability.
- Developed backend services and RESTful APIs with PHP and Laravel for third-party integrations.
- Implemented automated testing and development workflows with Cypress, improving release confidence and product stability.
- Contributed to the evolution of WordPress products across frontend, backend, integrations, and developer tooling.

YITH - yithemes.com

Senior Full Stack Developer | 2018 - 2022

- Developed and maintained complex WooCommerce plugins at scale, with a strong focus on performance, compatibility, and reliability.
- Built custom Gutenberg blocks with React, transitioning legacy interfaces toward modern block-based editing experiences.
- Maintained and refactored legacy JavaScript/jQuery code while progressively adopting modern frontend standards.
- Worked across the WordPress ecosystem, contributing code, providing technical feedback, and participating in community discussions.

Experience

Pragonauts (Czech Republic - in person)

Backend Developer | March 2018 - May 2018

- I developed chatbot backends for Facebook Messenger using Node.js and serverless architecture, focusing on real-time interaction and event-driven architecture.
- I designed scalable workflows (webhooks, queues/events) to maintain stable response times under varying traffic.
